

ABBYY FineReader Pro for Mac

Full feature list

Intelligent OCR & Document Conversion Technology	
Unmatched recognition accuracy — up to 99.8%*	•
Recognition languages / languages with dictionary support	189/45
Asian languages recognition Including Chinese, Japanese, Korean, Thai, Vietnamese	•
Multilingual recognition With any number and combination of languages in a document	•
Recognition of vertical, color and inverted text	•
Table cell content recognition Allows also specification of cell type and properties: text orientation, images, language, and more.	•
Processing of documents with signatures, company stamps and line numbering	•
Intelligent background filtering Automatically adjusts contrast when converting grayscale and color images to black and white prior to OCR	•
Barcode recognition (1-D and 2-D barcodes)	•
Multi-Page Document Reconstruction & Layout Retention	
ADRT® (Advanced Document Recognition Technology®) Entire document structure reconstruction with original formatting	Hierarchic heading structure, table of contents, headers, footers, vertical headers, page numbering, footnotes, fonts and font styles, captions to images/tables/diagrams, logical text flow, margin notes
Excellent layout retention Retains almost all document layout elements: charts, diagrams, text columns, images, tables, etc.	•
Re-creation of bullet points and numbering	•
Retention of hyperlinks	•
Accurate recognition of magazine-style pages	•
Table structure re-creation Re-creates tables and spreadsheets, incl. multi-page tables, making them fully editable withing text and tables editing applications (Microsoft® Word, Excel®, Apple Pages, Numbers and others)	•
Scanning and Image Import	
ICA-compatible scanners and MFPs support Supports network and Wi-Fi scanners (see the list of supported devices on Apple's website)	•
Multi-page scanning	•
ADF and duplex scanning options support	•
Managing scanning process with a scanner button	•

Pre-processing of scanned images To achieve best OCR results, FineReader automatically enhances scans and splits facing pages	•
Direct import of photos from digital camera / smartphone connected via USB, or from computer	•
Image input formats	PDF, TIFF, JPEG, JPEG 2000, PNG, BMP, GIF, PCX, DCX, JBIG, JBIG2
Preview of opening documents	•
Ease-of-Use with Intelligent Interface	
Results-driven interface in Mac OS X native style	•
Intelligent pre-defined Quick Task	•
UI languages supported	English, German, Russian, French, Spanish, Italian, and Japanese
Automatic detection of document languages	•
Direct export to multiple applications and clipboard	•
QuickTips Interactive tips guiding toward improving results on each conversion step	•
Section 508 compliance	•
Boosting Productivity with Fast and Accurate Results	
Fast document quotation Recognize selected area and copy results to clipboard within a click	•
Multi-core processing for faster results	•
Correction of recognition areas (Area Editor) Drawing rectangle and non-rectangle areas, areas with vertical, upside-down, RTL and hieroglyphic text	•
Batch processing Via Automator actions and AppleScript commands support	•
Task automation & Scheduling Via Automator actions and AppleScript commands support	•
Document saving formats	DOCX, RTF, ODT, TXT, XLSX, PPTX, PDF, PDF/A, HTML, EPUB, FB2, CSV
Image saving formats	TIFF, JPEG, JPEG 2000, PNG, BMP, PCX, DCX, JBIG2
Saving project to FineReader document Allows to pause working on large documents and return to work later	•
Export document with highlighted indefinitely recognized symbols	•
Send results to office application for polishing and further use Supports sending converted documents to various text or table editing applications	•
Send results as an email attachment	•
Direct printing from FineReader	•
PDF Conversion, Saving & Protection	
Creating searchable PDFs from images and scans	•
PDF file size and images quality ratio setting	•
Saving to PDF/A for a long-term archiving	•
Save to PDF and PDF/A of different types	Text-under-image, image-under-text, image only, text and pictures
MRC compression - reducing PDF size for sharing and archiving	•
Detection of internal links and hyperlinks	•
Comprehensive PDF processing Convert any type of PDF, even scanned without text layer (image only PDFs) and files with non-standard encoding	•
Convert password-protected PDFs (if the password is known)	•
Protect PDF with a password	•

Saving as tagged PDF files, optimized for handheld and screen-reader devices	•
PDF bookmarks creation	•
Adding PDF properties	•
Add properties to the document (title, author, keywords, subject) or edit added methadata	•
Digital Photos Conversion and OCR	
Converting digital photos of documents to editable files	•
Automatic correction of digital images	Correction of image resolution, improved texture filtering, straighten curved text lines and image de-skewing; ISO noise, 3D perspective, motion blur correction
Manual instruments for photo enhancing	Brightness&contrast, splitting dual pages, straighten curved text lines, reducing ISO noise, removing motion blur, crop, correction of trapezium distortions, and more
E-books Creation	
Create E-books in FB2 and EPUB formats	•
Saving to HTML with flexible layout	•
For easy editing, indexing, searching, and reading on portable devices	•

* According to internal ABBYY testing. Accuracy and formatting results can vary depending on factors such as document quality and scanner settings
